

At page 3, lines 6-7, replace "metal conductors which are coated with UV-curable" with --a radiation-curable--.

*A1*  
At page 3, lines 11-12, replace "metal conductor with a cured coating" with -radiation-curable coating composition, which can be applied to a metal conductor at a thickness--.

*A2*  
At page 3, lines 13-14, replace "thickness which cured coating" with -. The coating composition, after cure,--.

*A3*  
At page 3, lines 15-16, replace "and is a radiation-cured coating" with -, the radiation-cured coating composition being--.

*A4*  
At page 4, line 11, replace "metal conductor with a cured coating" with -radiation-curable coating composition, which can be applied to a metal conductor at a thickness--.

*A5*  
At page 4, line 15, replace "and is a radiation-cured coating" with -, the radiation-cured coating composition being--.

At page 5, line 23, replace "appears to have" with --has--.

*A6*  
At page 5, line 28, replace "The metal conductor preferably is an" with -Metal substrates which can be coated with the radiation-curable coating composition are--.

At page 6, line 18, after "The" delete "metal conductor is coated with a".

*A7*  
At page 6, line 19, after "composition" insert - is applied to the metallic substrate--
